Attorney Docket No.: 018563-005820US Client Reference No.: AT00112.2

DIGITALLY MODELING THE DEFORMATION OF GINGIVAL

## TISSUE DURING ORTHODONTIC TREATMENT

## CROSS-REFERENCES TO RELATED APPLICATIONS

[0001] This application is a continuation of U.S. Patent Application No. 10/280,556, wow U.S. Patent No. 6,685,470, (Attorney Docket No. 18563-005810-AT-00112.1), filed October 24, 2002, which was a continuation of U.S. Patent Application No. 09/311,716 (Attorney Docket No. 18563-005800 / AT-00112), filed May 14, 1999, the full disclosures of which are incorporated herein by pending reference.

10

This application is related to U.S. patent application 09/264,547, filed on [0002] March 8, 1999, and entitled "Segmenting a Digital Dentition Model," which is a continuation-in-part of U.S. patent application 09/169,276, filed on October 8, 1998, and entitled "Computer Automated Development of an Orthodontic Treatment Plan and Appliance," which claims priority from PCT application PCT/US98/12681, filed on June 19,

1998, and entitled "Method and System for Incrementally Moving Teeth," which claims priority from U.S. patent application 08/947,080, filed on October 8, 1997, which claims priority from U.S. provisional application 60/050,342, filed on June 20, 1997, all of which are incorporated by reference into this application.

This application also is related to U.S. patent application 09/311941, filed on May 14, 1999, and entitled "Manipulating a Digital Dentition Model to Form Models of Individual Dentition Components" (attorney docket number 09943/009001); U.S. patent application 09/169,036, entitled "System and Method for Positioning Teeth"; and U.S. patent application 09/169,034, entitled "Defining Tooth-moving Appliances Computationally," all of which are incorporated by reference.

## BACKGROUND OF THE INVENTION

25

30

20

The invention relates generally to the fields of dentistry and orthodontics. 100041 Two-dimensional (2D) and three-dimensional (3D) digital image technology has recently been tapped as a tool to assist in dental and orthodontic treatment. Many treatment providers use some form of digital image technology to study the dentitions of patients. U.S. patent application 09/169,276, incorporated by reference above, describes the use of 2D and 3D image data in forming a digital model of a patient's dentition, including models of individual
